

PTMSS Conference 2006

TABLE OF CONTENTS

Plenary Session I

Dr. Roger Quinn, Case Western Reserve University
Improving Robot Mobility Through Biological Inspiration

Dr. Gabe D'Eleuterio, UTIAS

Plenary Session II

Dave Willis, Falconbridge Mines

Dr. Erick Dupuis, CSA

Technical Session I

Paper 1-1: The Logistics of Mineral Exploration in Remote Areas

Author : Joe Hinzer – Watts, Griffis and McQuat Limited, Toronto, Canada

Paper 1-2: Frontiers Corporation – To Settle Mars and Engage in the Economic Dev of the Inner Solar System

Author : Joseph Palaia - VP Operations/R&D, 4Frontiers Corporation

Paper 1-3: CCC Gabriela Gref-Innes

Technical Session II

Paper 2-1: Slope Stability Analysis for Application on the Moon

Author: Masafumi Iai, Leslie Gertsch – University of Missouri-Rolla

Paper 2-2: Ground Control and Support in Weak Rock Conditions

Author: Dennis Shannon – NORCAT Inc.

Paper 2-3: Regolith Slope Stabilization

Author: Leslie Gertsch – University of Missouri-Rolla, Geological Sciences & Engineering Dept. and Rock Mechanics & Explosives Research Center

[Special Session – Mining Technology Developments](#)

Advances in Ultrasonically Forced Pulse Water Jets

Mohan Vijay – President, VLN Advanced Technologies Inc., 1166 Rainbow St.,
Ottawa ON, K1J 6X7
mvijay@vln-tech.com

Marcotte Mining Cassette Systems

Duncan Hutchison – Marcotte Mining Machinery Services Inc., 2291 Lasalle
Blvd., Sudbury ON, P3A 2A9

[Technical Session IV](#)

Paper 4-1: A Modeling Tool for Excavation and Transportation of Regolith on the Moon

Author: Christopher A. Gallo and Dr. Allen Wilkinson – NASA Glenn Research Center, 21000 Brookpark Road, Cleveland, Ohio 44135

Paper 4-2: A Flexible System Model Tool for ISRU Production Systems

Author: Dianne L. Linne, Chrostopher J. Steffen, Joshua E. Freeh, Eric W. Faykus, Christopher A. Gallo and Robert D. Green – NASA Glenn Research Center, 21000 Brookpark Road, Cleveland, Ohio 44135

Paper 4-3: Real-Time Simulation Tools for NASA Robotic Exploation and Mining Industry Applications Using Open-Source DSS Platform

*Author: Brad Blair - Center for Space Resouces, Colorado School of Mines, 1310 Maple St., Golden, Colorado 80401. bblair@mines.edu, 97200 280-5100
Bruce Daimer, Dave Rasmussen, Merryn Nielsen, Peter Newman and Ryan Norkus – DigitalSpace Corporation, 343 Soquel Ave., Santa Cruz CA 95062, bdamer@digitalspace.com*

Paper 4-4: 3D Imaging for Planetary and Terrestrial Mining Applications

Author: Adam Deslauriers - Neptec

[Technical Session V](#)

Paper 5-1: NASA Assessment of Excavation, Traction, Material Handling and Simulant-Soil Preparation Knowledge-Base Readiness

Author: Dr. Allen Wilkinson – NASA GRC and Dr. Phil Metzger – NASA KSC

Paper 5-2: Materials Requirements for Standard Lunar Highlands Regolith Simulants as Defined by the NASA Simulant Development Program

Author: Laurent Sabelle¹, Paul Carpenter², Doug Rickman³, Charles Owens, Raymond French³ and Carole McClemore³*

1 – ASRC Aerospace Corporation, NASA Kennedy Space Center, FL 32899

Laurent.Sabelle@nasa.gov

2 – BAE Systems Analytical and Ordnance Solutions, NASA Marshall Space Flight Center, AL 35812

3 – NASA Marshall Space Flight Center, AL 35812

** - Teledyne Brown Engineering, NASA Marshall Space Flight Center, AL 35812*

Paper 5-3: Development of Improved Lunar Regolith Simulants

Author: Robert Gustafson¹, Brant White¹, Marty Gustafson² and Dr. James Carter³

1 – Orbital Technologies Corporation (ORBITEC), 1212 Fourier Drive, Madison, WI 53717

2 – Planet LLC, 1212 Fourier Drive, Madison, WI 53717

3 – Department of Geoscience, University of Texas at Dallas

Paper 5-4: Development Issues for Lunar Regolith Simulants

Author: Doug Rickman¹, Paul Carpenter², Laurent Sabelle³, Charles Owens, Raymond French^a and Carole McClemore^a*

1 – National Space and Technology Center, NASA Marshall Space Flight Center, 320 Sparkman Drive, Huntsville, AL 35805; doug.rickman@nasa.gov

2 – BAE Systems Analytical and Ordnance Solutions, NASA Marshall Space Flight Center, AL 35812

3 – ASRC Aerospace Corp., NASA Kennedy Space Center, FL 32899

** - Teledyne Brown Engineering, NASA Marshall Space Flight Center, AL 35812*

^a – NASA Marshall Space Flight Center, AL 35812

Paper 5-5: Formation of Nanophase Iron Inside Mesoporous Silica Frameworks: Novel Preparation Strategies for Optimized Synthetic Lunar Regolith Formulations

Author: Louis Mercier, Luc Beaudet and Roger Pitre – Department of Chemistry and Biochemistry Centre in Mining Materials Research (CIMMR), Laurentian University, Sudbury, Ontario Canada

Paper 5-6: Excavation Properties of Frozen JSC-1 Lunar Regolith Simulant

Author: M. M. Battler¹, J. Richard², D. Boucher³ and J. G. Spray¹

¹ - Planetary Space Science Centre, Department of Geology, University of New Brunswick, Fredericton, NB, Canada E3B 5A3, Melissa.battler@unb.ca, jgs@unb.ca

² - Electric Vehicle Controllers Ltd., 2200 Valleyview Road, Val Caron, ON, Canada P3N1L1 jrichard@norcat.org

³ - Northern Centre for Advanced Technology Inc., 1400 Barrydowne Road, Sudbury, ON, Canada P3A 3V8 dboucher@norcat.org

Technical Session VI

Paper 6-1: Ground Mole Demonstrator for Mars Subsoil Exploration

Author: C. Bettanini, S. Debei, M. Giacometti, G. Parzianello and M. Zaccariotto – CISAS Padova, Italy

Renato Campaci, Roberto Finotello and Giorgio Rossi – S.p.A., Venezia, Italy
Gianfranco Visentin; European Space Agency, Noordwijk, The Netherlands, Gianfranco.Visentin@esa.int

Paper 6-2: Excavation of Regolith by Impinging Jets of Gas

Author: Philip T. Metzger¹, Christopher D. Immer², Bruce T. Vu³ and Carly M. Donahue^a

¹ - NASA/KSC Applied Physics Laboratory, KT-D-1, John F. Kennedy Space Center, FL 32899, USA Philip.T.Metzger@nasa.gov

² - ASRC Aerospace, EDL Rm. 170h M/S ASRC-10, Kennedy Space Centre, Florida 32899

³ - NASA/KSC Engineering Development Directorate, Structures & Analysis Branch, DX-F-3, John F. Kennedy Space Center, FL 32899, USA

^a – Department of Physics, Astronomy and Geology, Berry College, 2277 Martha Berry Hwy. NW, Mount Berry, GA 30149, USA

Paper 6-3: Processing Lunar Regolith for Gaseous Resource Extraction: Mixing and Transport of Evolving Volatiles and Reacting Species

Author: Kurt Sacksteder, NASA Glenn Research Center, Cleveland, OH, USA
Vedha Nayagam, National Center for Space Exploration Research, Cleveland, OH, USA

Bernard Rosenbaum, NASA Johnson Space Center, Houston, TX, USA

Lindsay Miller, National Center for Space Exploration Research, Cleveland, OH, USA

Paper 6-4: Deep Amorphous Transporter Explorer (DATE) for Mining and Caving Operations

Author: P.E. Clark, Code 695, NASA/GSFC and P.J. Boston, Earth and Environmental Science, NMTI

Paper 6-5: The Mars/Arctic Deep Drill Project

Author: Geoffrey Briggs - (Center for Mars Exploration) NASA Ames Research Center, Jeffrey George – Exploration Office NASA Johnson Space Center USA, George Cooper – Department of Civil and Environmental Engineering U.C. Berkley USA, Brian Derkowski - Exploration Office NASA Johnson Space Center USA, Samantha Domville – Computational Sciences Division NASA Ames Research Center USA, Roger Fincher – Baker Hughes Inc., USA, Chris Omelon – Department of Geology University of Toronto, Canada, Wayne Pollard – Department of Geology, McGill University, Canada, Lyle Whyte - Department of Geology, McGill University, Canada, Kris Zacny – Department of Civil and Environmental Engineering U.C. Berkley, USA

Paper 6-6: ISRU-Based Development of a Lunar Water Astroparticle Observatory

Author: Klaus Heiss, Alex Ignatiev and Paul van Susante

Paper 6-7: Experimental Demonstration of the Molten Oxide Electrolysis Method for Oxygen and Iron Production from Simulated Lunar Materials

Author: P.A. Curreri¹, S. Sen², E. Ethridge¹ and S. Hudson¹

¹ - NASA Marshall Space Flight Center, AL

² - BAE Systems, Huntsville, AL

Paper 6-8: Application of Artificial Neural Tissue-Based Controllers for Robotic Mining and Regolith Processing

Author: Jekanthan Thangavelautham, Krystof Skonieczny, Alexander Smith and Gabriele M.T, D’Eleutrio – Institute for Aerospace Studies, University of Toronto, 4925 Dufferin Street, Toronto, ON Canada M3H 5T6 thangav@ecf.utoronto.ca
